P-4030 MFP / P-4035 MFP

You do not need to whisper! Our multifunctional system will do that for you!

Now you can concentrate fully on your work – without any annoying background noises! Because the integrated Quiet Mode of the P-4030 MFP and P-4035 MFP reduces noise emissions when printing, scanning, copying or receiving faxes to a minimum. At the same time, the multifunctional system does of course offer you a maximum number of features and accessories, which can be increased at any time according to your individual requirements. In peace lies strength!

Your benefits:

Quiet and space-saving: whether you want to scan, print, copy or send faxes – in Quiet Mode you hardly notice that these jobs are being carried out. This spares your nerves, while at the same time the almost square footprint and the attractive appearance of this multifunctional system save space and are a pleasure to behold.

Safe & convenient: confidential documents remain confidential – thanks to the "Private Printing" function and the fact that before the job is printed out, a PIN that has previously been stored in the driver has to be entered. Furthermore, the "ID card copy" function means that the all-round system can copy the front and back of small-format originals on one page in order to save paper.

Productive & professional: a 75-sheet automatic document feeder scans up to 40 A4 pages per minute and also offers the possibility of processing even double-sided originals in A6R format, such as prescriptions or cheques, automatically. The printing and copying processes are also carried out at 40 A4 pages per minute.

Environmentally-friendly & efficient: low energy consumption values in combination with long-life consumables protect the environment and your budget. There are 100 management codes available to improve cost transparency which can be assigned to individual users, groups or even projects. An optional card reader makes it possible to retrieve print jobs quickly and reliably from any system that is connected to the network. You no longer have to remember any password!
